humaidakah@gmail.com | +966 50 589 1400 | [LinkedIn](#) | Saudi Arabia

SUMMARY

Computer Science graduate from KFUPM with a strong foundation in software engineering, full-stack development, and cloud infrastructure. Experienced in building web and mobile applications, with hands-on work in AWS, GCP, Docker, and CI/CD, and knowledge of distributed systems. Seeking a software engineering role where I can contribute my knowledge and skills while continuing to grow as an engineer.

EDUCATION

King Fahd University of Petroleum and Minerals

2021 – 2026

Bachelor of Science in Computer Science — Concentration: Cloud Computing

Saudi Arabia

- **Cumulative GPA:** 3.874 / 4.00 | **Major GPA:** 3.844 / 4.00
- **Core Coursework:** Object Oriented Programming, Data Structures and Algorithms, Principles of Software Engineering, Databases, Web Development and Engineering, Networks and Data Communication

EXPERIENCE

Saudi Aramco — Data Analyst Intern

Jun – Aug 2025

- Built interactive Power BI dashboards and reports that turned raw operational data into clear visualizations for stakeholders
- Wrote DAX queries to create calculated measures and custom metrics, enabling more meaningful analysis than the raw data allowed
- Developed a working understanding of Python automation and its role in streamlining repetitive reporting tasks

PROJECTS

QuickCard FaaS on OpenStack (Microservices)

May 2026

- Deployed a Function-as-a-Service (FaaS) platform on an OpenStack VM using faasd and Docker to run lightweight, on-demand microservices
- Gained exposure to configuring the networking, IP addressing, and security groups to keep the services private and reachable only from within the cloud environment

Static Website Hosting on AWS (S3 + CloudFront)

Dec 2025

- Hosted a static website on AWS by storing the files in S3 and using CloudFront as a global CDN to make the site load quickly for users worldwide
- Configured S3 access policies, caching rules, and HTTPS to keep the site secure and high-performance

Distributed Solar Panel Telemetry Pipeline

May 2025

- Built a system that collects sensor data from 3 simulated solar-panel edge servers, using UDP with acknowledgments and retries to prevent data loss over an unreliable network
- Implemented the central collector in Flask with a React dashboard for real-time visualization, persisting all readings as JSON Lines

Train-Booking System (MERN)

Dec 2024

- Developed a full-stack web app for booking train tickets using the MERN stack, with an interface for seat selection and reservation management
- Implemented secure user authentication with JWT so passengers can sign in, book tickets, and view their booking history

TECHNICAL SKILLS

- **Web Development (Full-Stack):** MERN Stack (MongoDB, Express.js, React, Node.js), HTML, CSS, JavaScript
- **Mobile Development (Full-Stack):** Flutter & Dart
- **Programming Languages:** Java, Python, JavaScript, Dart, C, SQL
- **DevOps & Containerization:** Docker, Terraform, Linux, VirtualBox, GitHub Actions, CI/CD
- **Cloud:** AWS (S3, EC2, CloudFront), Google Cloud Platform (GCP), OpenStack
- **Version Control:** Git, GitHub
- **Databases:** Database Design and Normalization, SQL, MongoDB

SOFT SKILLS

- Translating complex requirements into clear technical solutions
- Coordinating across multidisciplinary engineering teams
- Producing professional technical documentation and reports
- Self-directed learning and rapid adoption of new tools and frameworks

CERTIFICATES

- Flutter & Dart – The Complete Guide by Maximilian Schwarzmüller (Udemy)
- Software Architecture & Design of Modern Large Scale Systems by Michael Pogrebinsky (Udemy)

AWARDS

- Dean's Honor List — Department of Computing and Mathematics, KFUPM 2025
- Outstanding Performance Award in Physics — KFUPM Physics Department 2023
- Outstanding Performance Award in Mathematics — KFUPM Mathematics Department 2022

LANGUAGES

- **Arabic:** Native | **English:** Fluent — TOEFL PBT (KFUPM) 607/677 (≈ IELTS 7.0–7.5)
